

Bioanalytical Services

Synomics Pharma Services provides the bioanalytical capabilities of a large laboratory with the agility, flexibility, and personalized service characteristic of smaller organizations. We are uncompromising in our commitment to producing studies of the highest quality, completed to your specifications and timeline, while continually keeping you informed.

BIOANALYTICAL SERVICES

- GLP and non-GLP services
- Customized LC/MS/MS method development with strategies to ensure method robustness
- Stage-specific LC/MS/MS validation in accordance with FDA guidelines and current industry best practices
- Sample analysis for clinical and non-clinical studies
- Biomarker services
- Continually expanding list of validated methods for non-proprietary compounds

BIOANALYTICAL INSTRUMENTATION

- MDS Sciex API 4000 and 3000 LC/MS/MS
- Waters Quattro Micro LC/MS/MS
- Agilent 1200 SL HPLC for high pressure applications
- 96-well sample processing and analysis
- Agilent 6890/5973 GC/MS systems
- Agilent 6890 GC systems (FID, FPD, μ ECD, NPD, TCD, Tekmar Headspace)

REGULATORY COMPLIANCE

- FDA registered and inspected facility
- Quality System meeting GLP and GMP requirements for FDA, OECD, EPA, and ICH
- Independent Quality Assurance Unit for in-house auditing and data review, ensuring rigorous compliance with current regulations
- Licenses for DEA Schedule I-IV controlled substances
- Licenses for radioactive materials

Synomics Pharma Services is prepared to be a seamless extension of your laboratory. Our experienced staff offers a collaborative approach, accommodating your needs for project meetings and communication, project execution and timelines, and customized reporting. Contact us.
